

## Stressful Dyadic Interrogations (SDI-003-C)

Supplemental (to SDI-003-B,) on associated research programs  
Also see: Conflict Management (CM-003, BUT-003)

*“This Holocaust stuff never happened. – Are you high? 'Cause I'd say the Holocaust is one of the most beautiful things I've ever seen.” -Lee, Spike, “BlacKkKlansman,” F. F., 2018.*

Subject 1 demonstrates disjunctive thinking, (Attribute Reduction; as non-integrative, dissociative, Behavior Under Trance,) while Subject 2 demonstrates the Demand Characteristic, role of a Negative Participant.<sup>1</sup> Both are exhibiting signs of behavior in an Experimental Situation as a demonstration of Stressful Dyad.

Both appear to be motivated by a strong need for Affiliation. S<sup>2</sup> experiences what Branscombe would call Categorization Threat,<sup>2</sup> whereas S<sup>1</sup> likely experiences Distinctiveness Threat,<sup>3</sup> when his racial superiority beliefs are threatened.

Apperceptive Reactions of both can reveal useful information about the true personality & characteristics of each,<sup>4</sup> including self-esteem, etc.

Eg. S<sup>1</sup> may be interpreted to have low self-esteem, low intellect, high-stress drive, and past history of parental maltreatment; whereas S<sup>2</sup> may be interpreted, in-spite of his comments, to be sympathetic to the topic of question.

*(Notably, the work of R.A. Hudson (1999) [Federal Research Division,] and J. R. Meloy do not refer to either, [Bruner or Branscombe,] demonstrating a credibility gap in their methodology.)*

1 (It could even potentially be considered Submissive Behavior, as a pathological adaptation [compliance] to Stress, or Abasement, as a typological predisposition; and prelude to indoctrination.)

2 “Being categorized against one’s will,”

3 “Group distinctiveness is prevented or undermined,”

4 Particularly where it regards Memory Schemata, Socialization, or Ego-ideal, as values.

These techniques are in common use by NATO countries, such as eg. by the Canadian Border Services Agency, during their 'Front End Security Screening' procedures; in addition to Concealed Information & Guilty Knowledge Tests.

Agents employing these procedures however are not forensically trained personnel, but appear to be selected for their aggressive, and anti-social personality habits; (making such interrogations 'experimental situations,') of the type seen in the film. Interviews are discretely recorded, and later analyzed by other personnel. Information entered into NCIC databases regarding these interrogations is often fraudulent, and used toward Stress Adaptation research, as a component of Enhanced Interrogation [Clean Torture,] techniques.

False-positives elicited by these techniques may also be used to establish probable cause, generate false confessions, or entrap political dissidents; as an ambit of Psychological / Political Warfare.

Motivation of interrogators appears to be based on information contained in NCIC databases, as an aspect of antisocial behavior under trance, (or Ideologically Motivated Behavior.)

It may be noted that repeated, or cumulative traumas induced by such procedures can lead to ego-fragmentation disorders; and were the cause of Ted Kaczynski's behavior, after his experiences as a subject of experiments with H.A. Murray, (of Cambridge University; student of F. Bartlett.) In certain cases it may also lead to death.<sup>5</sup>

---

---

## Research Programs:

U.S. Medical Practitioners, (particularly Federally Qualified Health Centers,)<sup>6</sup> have been engaging in non-therapeutic, Stressful Dyadic Interrogations with patients, under “Threat Assessment,” guidelines, (pursuant to the PATRIOT ACT,) and share those opinions with United States Intelligence Components, such as the Department of Homeland Security.

*(Also see: HudsonRA1999-000, BUT-003, CM-003.)*

TAM guidelines impute requests for assistance, or complaints as indicative of imminent threat, (endogenous pathology, or deviance.)

Sequelae (of torture,) is colored as a positive result; which gives NATO Governments plausible deniability in concealing Serious Human Rights Offenses.

*"...asking that evidence of his “torture” be entered into any official report—indicates that the interviewee is familiar with [Al Qaeda.]”<sup>7</sup>*

Compare with American Psychiatric Association guidelines:<sup>8</sup>

*"Malingering should be strongly suspected if the individual is referred by an attorney to the clinician for examination, or the individual self-refers while litigation or criminal charges are pending."*

The methodology of T.A.M. is fundamentally unsound, in that:

- (a) There is no null-hypothesis
- (b) Meloy does not acknowledge equipotentiality, (Morris I. Stein)
- (c) It is employed interventionist causality

TAM procedures, in addition to APA Diagnostic & Statistic guidelines qualify as Dyadic Apperceptive Disputations; (and are not objective, forensic assessments, but behavior under trance.)

These practices are also not in accordance with United Nations guidelines for assessing injuries related to Torture, such as the Istanbul Protocol.

*(Also see: Plenum Series on Stress & Coping.)*

These activities have been described in School of the America’s literature, (ca. 1980’s, Latin America,) as counterintelligence programs; resulting in the Social & Ethnic Cleansing of populations, and are also used to justify the forcible Human Medical Experimentation of persons, as an element of *Arbeitskräfteerkrutierungen*; which are Crimes Against Humanity.<sup>9</sup>

*(Also see: USA vs. Karl Brandt,)<sup>10</sup>*

6 42 USC Public Health Service Act

Also see: “Anti-social Behaviour Order”

7 Meloy, J R, and Jens Hoffmann. International Handbook of Threat Assessment. Oxford: Oxford University Press, 2014, p. 390.

8 Note: Canadian Psychiatric Association eg., utilizes the same methodology.

9 Rome Statutes, Article 7(c): “Enslavement” means the exercise of any or all of the powers attaching to the right of ownership over a person and includes the exercise of such power in the course of trafficking in persons.

10 Original volumes of this series may be found in the collections of the Library of Congress and The Judge Advocate General’s Legal Center & School Library, U.S. Army, Charlottesville, Virginia:

*Note: Due to 'Risk Management' (tort-liability legal fiction,) deaths & injuries resulting from these acts are often deliberately mislabeled as undocumentable / undocumented pre-existing conditions, with unknown etiology, (Kraepelian methodology.)*<sup>11</sup>

U.S. victims of these practices often do not have equitable access to objective medical care, (*practitioners without disabling conflicts to tort-feasors,*) expert witness testimony, or meaningful access to the Courts, thus denying them Equal Protection under law, while evading Due Process protections.<sup>12</sup>

Victims are always denied the presence of legal counsel during these interrogations / research, because they occur (as 'Terrorist' & Behavioral Screening, procedures) outside formal charges, (*extra-legal.*)

Insisting upon, or requesting legal counsel is imputed as positive for concealing information relevant to terrorist activity, and entered into reports as "non-cooperation," (often justifying more severe measures.) Victims are selected on the basis race, or ethnicity, as being genetically predisposed to crime, terrorism, drug addiction, and violence, in addition to other qualifiers such as low-income, social status, or imputed political opinion, (etc.)<sup>13</sup>

Attempting to flee such acts, or research activities may result in extra-territorial<sup>14</sup> operations against the victim; or criminal investigation for "irregular migration,"<sup>15</sup> when requesting asylum, or seeking foreign residency, in other NATO member countries, (or elsewhere.)

Note: A disproportionate amount of these programs target Latino children, (or Blacks.)

"Research Activities" include actions conducted pursuant to information collected, shared, or analyzed pursuant to Research Programs.

The United States in partnership with adverse parties has caused harms for the purposes of studying them, and release of information to the United States, or other adverse parties is used for those purposes, and in furtherance of future similar acts.

Similar programs were operated by the Joint Information Service,<sup>16</sup> in the 1950's. These programs are authorized generally pursuant to National Security, "Manpower" doctrines, of Total Warfare, and the Defense Production Act (1950.) Today operated through Infrastructure Investment and Jobs Act, and Water-Energy Nexus, 'Climate Change' agenda.
